

## **CERTIFICATE OF EXCLUSIVITY AND COMPLIANCE WITH ETHICAL CHARTER BY AUTHOR**

---

I hereby certify that the present article results exclusively from the research that I/we have undertaken on an individual and/or collective basis; that all sources used herein have been clearly indicated in the body of the text and feature in the bibliographic list found in its appendix; and that the text in its current form has not been submitted to any other publisher.

I undertake that I will not submit my article to another journal while it is under review by Gestion et Management Public (GMP). Any failure to comply with this clause will result in the article not being published by GMP, even if a decision had previously been made to accept it for publication.

Where an article has been reworked in the wake of a research conference or event presentation, I undertake to propose a text that does not merely reproduce said presentation but which differs from it significantly. I also undertake to insert a cover page and a footnote indicating the origin of such articles (presentation or conference paper, research notebook, etc.).

I agree to GMP carrying out similarity/anti-plagiarism checks before publication, specifically by using dedicated software towards this end.

I declare that I have read the ethical charter of GMP journal, which is available on its website, and undertake to respect it. I have been informed of the disciplinary and legal consequences in the event of plagiarism or intentional manipulation of the data collected.

As the author, I declare that I meet all of the following conditions:

- I have made a significant contribution to the design and execution of the study, or to the acquisition of data, or to their analysis and interpretation;
- I have made a significant contribution to the drafting of the manuscript or to the critical revision of its intellectual content.
- I have given final approval to the version to be published. I assume public responsibility for the content and its compliance with the rules of scientific integrity.
- I agree that contributions from anyone who does not meet these criteria will be listed, with the contributor's permission, in the Acknowledgements section.

I declare that I have no potential professional or financial conflict of interest in connection with this article submission.

I undertake to mention all sources of public and non-public funding for the research presented. I undertake to mention in the article any use of generative artificial intelligence (AI) in the design and/or production of the proposed article.

At the editor's request, I will provide the raw data related to this research. Insofar as possible, I undertake to provide public access to this data, and therefore to retain it for a reasonable period after publication, or to deposit it in freely accessible databases.
